

FOR IMMEDIATE RELEASE

**Patient Flow Technology Provider a Leader among Western Pennsylvania Companies**

*Among top 100 fastest growing companies five years in a row*

PITTSBURGH – August 24, 2007 -- For the fifth straight year, TeleTracking Technologies, Inc., the healthcare industry's leading developer of capacity management and patient flow solutions, has been named to the Pittsburgh Business Times' annual "Pittsburgh 100" list of fastest growing privately-owned companies.

Tele-Tracking was #16 in the Technology sector, and #71 overall, up from #74 in the previous year. The ranking reflects sales growth of 59.2% from 2004 to 2006 and a 45.7% increase in employment.

**About TeleTracking**

TeleTracking Technologies is the world leader in patient flow automation, serving over 680 hospitals in the US, Canada and the United Kingdom. They provide a wide array of software products and services designed to deliver real-time control over the patient flow process, which is acknowledged as the No. 1 cause of hospital overcrowding worldwide.
